### 1. ORGANIZATION AND OPERATIONS OF THE COMPANY

İş Finansal Kiralama A.Ş. ("the Company") was incorporated on 9 March 1988 to operate in Turkey in accordance with Finance Lease, Factoring and Financing Companies Law No: 6361. The core business of the Company is leasing operations, both domestic and abroad, and it started its leasing operations in July 1988. The head office of the Company is located at İş Kuleleri Kule:1 Kat:6 34330 Levent-İstanbul/Turkey.

The Company has purchased nominal shares of İş Faktoring A.Ş. ("İş Faktoring") amounting to TL 12.517 in consideration of USD 10.952.375 on 11 August 2004. The Company owns 78,23% of this subsidiary and it has been consolidated in the accompanying financial statements.

The Company and its subsidiary run their operations in accordance with "Finance Lease, Factoring and Financing Companies Law" published on the Official Gazette no. 28496 dated 13 December 2012 and "Regulation on Principles for Establishment and Operations of Finance Lease, Factoring and Financing Companies" of Banking Regulation and Supervision Agency ("BRSA").

The ultimate parent of the Company is Türkiye İş Bankası A.Ş. The main shareholders of the Company are Türkiye İş Bankası A.Ş. with 27,79% and Türkiye Sınai Kalkınma Bankası A.Ş. ("TSKB") with 28,56% participation. The Company's 42,67% of shares are publicly traded and listed on the Borsa İstanbul.

As at 31 December 2015, the Company and its subsidiary ("the Group") have 234 employees (31 December 2014: 222 employees).

#### Dividend Payable

As at 31 December 2015, the Company does not have any dividend payable.

#### Approval of the Financial Statements

The consolidated financial statements as at 31 December 2015 have been approved by the Board of Directors of the Company and authorized for issue as at 27 January 2016. The General Assembly and / or legal authorities have the discretion of making changes in the accompanying consolidated financial statements after their issuance.

### 2. BASIS OF THE FINANCIAL STATEMENTS

#### 2.1 Basis of the Presentation

##### Accounting Standards Applied

The Group prepared accompanying financial statements due to the "Regulation on Accounting Practices and Financial Statements of Financial Leasing, Factoring and Financing Companies" and the "Communiqué on Uniform Chart of Accounts and Prospectus to be implemented by Financial Leasing, Factoring and Financing Companies" published in the Official Gazette dated 24 December 2013 and numbered 28861 and Turkish Accounting Standards and Turkish Financial and Reporting Standards published by Public Oversight Accounting and Auditing Standards Institute (POAAS), and other regulations, communiqués, and circulars announced by the Banking Regulation and Supervision Agency ("BRSA") in respect of accounting and financial reporting.

**31 DECEMBER 2015**

(Amounts are expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

**2. BASIS OF THE FINANCIAL STATEMENTS (Continued)**

**2.1 Basis of the Presentation (Continued)**

Accounting Standards Applied (Continued)

The consolidated financial statements have been prepared on the historical cost basis, except for the financial instruments measured at fair value. Determination of historical cost is generally based on the fair value amount paid for the assets.

Additional Paragraph for Convenience Translation to English

The differences between accounting principles, as described in the preceding paragraphs, and the accounting principles generally accepted in countries, in which the accompanying financial statements are to be distributed, and International Financial Reporting Standards ("IFRS"), may have significant influence on the accompanying consolidated financial statements. Accordingly, the accompanying consolidated financial statements are not intended to present the consolidated financial position and consolidated results of operations in accordance with the accounting principles generally accepted in such countries and IFRS.

Functional and Reporting Currency

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in TL, which is the functional currency of the Group, and the presentation currency for the consolidated financial statements.

Preparation of Financial Statements in Hyperinflationary Periods

The consolidated financial statements of the Group have been adjusted for the effects of inflation in accordance with TAS 29 "Financial Reporting in Hyperinflationary Economies" until 31 December 2004. By a circular issued on 28 April 2005, BRSA and by a decision taken on 17 March 2005, Capital Markets Board of Turkey ("CMB") declared that the application of inflation accounting has been ceased to be applied for the companies operating in Turkey starting from 1 January 2005, since the provisions of hyperinflationary economy do not exist anymore. Accordingly, non-monetary assets and liabilities, and components of equity as at 31 December 2015 were adjusted for the effects of inflation that lasted till 31 December 2004 for the items acquired before 31 December 2004 and the items which were acquired after 1 January 2005 were accounted for at their respective nominal amounts.

Comparative Information and Restatement of the Prior Periods' Consolidated Financial Statements

The Group's consolidated financial statements are prepared comparatively with the prior period in order to provide information on the financial position and performance of the Group. When the presentation or classification of financial statements is changed, prior period's financial statements are also reclassified in line with the related changes in order to sustain consistency and all significant changes are explained.

**2. BASIS OF THE FINANCIAL STATEMENTS (Continued)**

**2.1 Basis of the Presentation (Continued)**

Accounting estimates

The preparation of consolidated financial statements requires management to make judgements, estimates and assumptions that affect the application of accounting policies and the reported amounts of assets, liabilities, income and expenses. Actual results may differ from these estimates.

Estimates and underlying assumptions are reviewed on an ongoing basis. Revisions to accounting estimates are recognized in the period in which the estimate is revised and in any future periods affected. In particular, information about significant accounting estimates used are described in the following notes:

- Note 4 – Financial assets and liabilities at fair value through profit or loss
- Note 7 – Factoring receivables
- Note 8 – Lease receivables
- Note 10 – Tangible assets
- Note 13 – Deferred tax assets and liabilities
- Note 21 – Provisions
- Note 22 – Employee benefits
- Note 28 – Commitments and contingencies

Basis of Consolidation

The details of the Group's subsidiary as at 31 December 2015 and 31 December 2014 are as follows:

<u>Subsidiary</u>	<u>Establishment and operation location</u>	<u>Shareholding rate %</u>	<u>Voting right rate %</u>	<u>Core business</u>

The accompanying consolidated financial statements include the accounts of the Company and its subsidiary on the basis set out in "Subsidiaries" section below. The accounting policies of subsidiaries have been changed when necessary to align them with the policies adopted by the Group.

(i) Subsidiaries

Subsidiaries are entities controlled by the Group. Control exists when the Group has the power to govern the financial and operating policies of an entity so as to obtain benefits from its activities.

In assessing control, potential voting rights that currently are exercisable are taken into account. The financial statements of subsidiaries are included in the consolidated financial statements from the date that control commences until the date that control ceases.

As at 31 December 2015 and 31 December 2014, the Company owns 78,23% of İş Faktoring. As the Company has the power to control the operations of the İş Faktoring, the financial statements of İş Faktoring have been fully consolidated in the accompanying consolidated financial statements.

## 2. BASIS OF THE FINANCIAL STATEMENTS (Continued)

### 2.1 Basis of the Presentation (Continued)

#### Basis of Consolidation (Continued)

(ii) Transactions eliminated on consolidation

Financial statements of İş Factoring have been fully consolidated in the accompanying financial statements and the investment balance in the Company's statement of financial position have been eliminated against the paid-in capital of İş Factoring. Intra-group balances, transactions and any unrealized income and expenses arising from intra-group transactions, are eliminated in preparing the consolidated financial statements. The accounting policies of the subsidiary have been adjusted when necessary to align them with the policies adopted by the Group.

All intra-group transactions, balances, income and expenses are eliminated on consolidation.

(iii) Non-controlling interests

Non-controlling interests in the net assets of consolidated subsidiaries are identified separately from the Group's equity therein. Non-controlling interests consist of the amount of those interests at the date of the original business combination and the non-controlling interest in equity since the date of the combination.

#### Offsetting

Financial assets and liabilities are offset and the net amount is reported in the consolidated statement of financial position when there is a legally enforceable right to set off the recognized amounts and there is an intention to settle on a net basis, or to realize the asset and settle the liability simultaneously.

### 2.2 Changes in Accounting Policies

The group has changed the valuation method for tangible fixed assets and in accordance with Standards on Tangible assets (TAS 16) It has adopted the revaluation method in 2015. Appraisal value has been reflected in the financial statements. The financial statements are restated prospectively in accordance with the TAS 16. The effects of changes in accounting policy for the current period are as follows:

<b>Real Estate</b>	<b><u>31 December 2015</u></b>
Valuation at Cost (Net amount) :	TL 15.732
The effect of changes in accounting policy :	TL (602)
The fair value valuation :	TL 15.130

The other accounting policies applied for the year ended 31 December 2014 have been applied consistently for the year ended 31 December 2015 in preparing these financial statements.

### 2.3 Changes in Accounting Estimates and Errors

If the changes in accounting estimates relate to a specific period, they are applied in the period they relate to whereas if the changes are related to future periods, they are applied both in the period the change is made and prospectively in the future periods. There has not been any significant change in the accounting estimates of the Group in the current period.

Material accounting errors are adjusted retrospectively and prior periods' consolidated financial statements are restated.

**2. BASIS OF THE FINANCIAL STATEMENTS (Continued)**

**2.4 Changes in Standards and Interpretations**

The Group applied all of the relevant and required TAS as at 31 December 2015.

A number of new standards, amendments to standards and interpretations are effective for annual periods beginning after 31 December 2015, and have not been applied in preparing these consolidated financial statements. Those which may be relevant to the Group are set out below;

**TFRS 9 - Financial instruments**

TFRS 9 - As amended in December 2012, the new standard is effective for annual periods beginning on or after 1 January 2018. Phase 1 of this new TFRS 9 introduces new requirements for classifying and measuring financial assets and liabilities. The amendments made to TFRS 9 will mainly affect the classification and measurement of financial assets and measurement of fair value option (FVO) liabilities and requires that the change in fair value of a FVO financial liability attributable to credit risk is presented under other comprehensive income. Early adoption is permitted. The Group is in the process of assessing the impact of the standard on financial position or performance of the Group.

**3. SIGNIFICANT ACCOUNTING POLICIES**

a. Revenue

Finance lease income: Initial value of leased assets at the beginning of the leasing period under the Finance Lease, factoring and Financing Companies Law No: 6361 is recognized as finance lease receivables in the consolidated statement of financial position. Interest income resulting from the difference between the total finance lease receivables and the investment value of the leased assets are recognized in the period in which the relevant receivable portion for each accounting period is distributed over the related period using the fixed interest rate through the leasing period. The interest income not accrued yet is followed up under the account of unearned interest income.

Factoring revenue: Consists of factoring interest and commission income collected or accrued on advances given to the customers.

Factoring commission income is a certain percentage of the total amount of invoices subject to factoring transactions.

Other interest income is accrued based on the effective interest which equals the estimated cash flows to net book value of the related asset.

Dividend income from equity share investments is recognized when the shareholders have the right to receive the dividend.

Commissions collected or paid on any transactions are recorded on accrual basis.

**3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

b. Tangible Assets

Tangible assets, except for the buildings measured at fair value, acquired before 1 January 2005 are carried at restated cost for the effects of inflation in TL units current at the 31 December 2004 less accumulated depreciation and impairment losses, and tangible assets acquired after 31 December 2004 are carried at acquisition cost less accumulated depreciation and impairment losses.

Tangible assets are depreciated over the estimated useful lives of the related assets on a straight-line basis over the cost. The estimated useful lives, residual values and depreciation method are reviewed at each reporting date.

Leasehold improvements are depreciated over their respective lease periods.

The cost of replacing part of an item of tangible assets is recognized in the carrying amount of the item if it is probable that the future economic benefits embodied within the part will flow to the Group and its cost can be measured reliably. The costs of the day-to-day servicing of tangible assets are recognized in the profit or loss as incurred.

The estimated useful lives for the current and comparative periods are as follows:

<u>Definition</u>	<u>Years</u>
Furniture and fixtures	5 years
Vehicles	5 years
Leasehold improvements	5 years
Buildings	50 years

Gains and losses on disposal of an item of tangible assets are determined by comparing the proceeds from disposal with the carrying amount of tangible assets, and are recognized net within other operating income/expense in the consolidated income statement.

c. Intangible Assets

Intangible assets include computer software, licenses and goodwill. Intangible assets acquired before 1 January 2005 are carried at restated cost for the effects of inflation in TL units current at the 31 December 2004 less accumulated amortisation and impairment losses and intangible assets acquired after 31 December 2004 are carried at acquisition cost less accumulated amortisation and impairment losses. The estimated useful lives, residual values and amortization method of intangible assets other than goodwill are reviewed at each reporting date. Amortization is charged on a straight-line basis over their estimated useful lives. The intangible assets are comprised of computer software and licenses. The useful lives of intangible assets are 5 years.

Acquired computer software licenses are capitalized on the basis of the costs incurred to acquire and bring to use the specific software. These costs are amortized over their useful lives. Costs associated with developing or maintaining computer software programs are recognized as an expense as incurred. Costs that are directly associated with the development of identifiable and unique software products controlled by the Group, and that will probably generate economic benefits exceeding costs beyond one year, are recognized as intangible assets. Computer software development costs recognized as assets are amortized over their estimated useful lives (not exceeding five years).

The estimated useful life and amortization method of intangible assets are reviewed at each reporting period and corrected if necessary.

**3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

d. Impairment of Non-Financial Assets

Assets that have an indefinite useful life, like goodwill, are not subject to amortization, but tested annually for impairment. Assets that are subject to amortization are reviewed for impairment whenever events or changes in circumstances indicate that the carrying amount may not be recoverable. An impairment loss is recognized for the amount by which the asset's carrying amount exceeds its recoverable amount. Recoverable amount is the higher of an asset's fair value less costs to sell or value in use. For the purposes of assessing impairment, assets are grouped at the lowest levels for which there are separately identifiable cash flows (cash-generating units). Impaired non-financial assets other than goodwill are reviewed for possible reversal of the impairment at each reporting date.

e. Borrowing Costs

All borrowing costs are recorded in the income statement on accrual basis.

f. Financial Assets Held For Sale

Assets (or disposal groups comprising assets and liabilities) that are expected to be recovered primarily through sale rather than through continuing use are classified as held for sale. Immediately before classification as held for sale, the assets (or components of a disposal group) are remeasured in accordance with the Group's accounting policies. Thereafter generally the assets (or disposal group) are measured at the lower of their carrying amount and fair value less cost to sell. Impairment losses on initial classification as held for sale and subsequent gains or losses on remeasurement are recognized in the consolidated income statement. Gains are not recognized in excess of any cumulative impairment loss.

g. Financial Instruments

*Financial assets*

All financial assets are recognized and derecognized on a trade date where the purchase or sale of a financial asset is under a contract whose terms require delivery of the financial asset within the timeframe established by the market concerned, and are initially measured at fair value, plus transaction costs except for those financial assets classified as at fair value through profit or loss, which are initially measured at fair value.

Financial assets are classified into the following specified categories: "financial assets as at fair value through profit or loss ("FVTPL)", "held-to-maturity investments ("HTM")", "available-for-sale ("AFS") financial assets and "loans and receivables". The classification depends on the nature and purpose of the financial assets and is determined at the time of initial recognition.

*Effective interest method*

The effective interest method is a method of calculating the amortized cost of a financial asset and of allocating interest income over the relevant period. The effective interest rate is the rate that exactly discounts estimated future cash receipts through the expected life of the financial asset, or, where appropriate, a shorter period to the net carrying amount on initial recognition.

Income is recognized on an effective interest basis for debt instruments other than those financial assets designated as at FVTPL.

g. Financial Instruments (Continued)

Financial assets (Continued)

*Financial assets at FVTPL*

Financial assets at fair value through profit or loss are financial assets held for trading and financial assets designated under this category upon initial recognition. A financial asset is classified in this category if acquired principally for the purpose of selling in the short-term or achieved more relevant accounting measurement. Derivatives are also categorized as held for trading unless they are designated as hedges.

*Held-to-maturity investments*

Non-derivative financial assets with fixed or determinable payments and fixed maturity dates that the Group has the positive intent and ability to hold to maturity are classified as held-to-maturity investments. Held-to-maturity investments are recorded at amortized cost using the effective interest method less impairment, with revenue recognized using effective interest method.

*Available for sale financial assets*

Quoted equity investments and quoted certain debt securities held by the Group that are traded in an active market are classified as being available-for-sale financial assets and are stated at fair value. The Group also has investments in unquoted equity investments that are not traded in an active market but are also classified as available-for-sale financial assets and stated at cost since their value cannot be reliably measured. Gains and losses arising from changes in fair value are recognized in other comprehensive income and presented under the marketable securities revaluation reserve with the exception of impairment losses, interest calculated using the effective interest method, and foreign exchange gains and losses on monetary assets, which are recognized in profit or loss. Where the investment is disposed of or is determined to be impaired, the cumulative gain or loss previously accumulated in the marketable securities revaluation reserve is transferred to profit or loss.

Dividends on available-for-sale equity instruments are recognized in the profit or loss when the Group's right to receive the dividends is established.

The fair value of available-for-sale monetary assets denominated in a foreign currency is determined in that foreign currency and translated at the exchange rate valid at the end of the reporting period. The foreign exchange gains and losses that are recognized in profit or loss are determined based on the amortized cost of the monetary asset. Other foreign exchange gains and losses are recognized in other comprehensive income.

*Finance lease receivables, factoring receivables and other receivables*

Finance lease receivables, factoring receivables and other receivables are carried at fair value at initial recognition and they are carried at amortized cost subsequent to initial recognition, using the effective interest method.

Provision for doubtful finance lease receivables, factoring receivables and other receivables are recognized as an expense and written off against the profit for the year. Provision for non-performing receivables is allocated assessing the Group's loan portfolio, quality and risk and considering the economic conditions and other factors including the related legislation against the potential losses that may be resulted from the current finance lease and factoring receivables. In accordance with the "Regulation on Accounting Practices and Financial Statements of Financial Leasing, Factoring and Financing Companies" published in the Official Gazette dated 24 December 2013 and numbered 28861 and the "Communiqué on Procedures and Principles for the Provisions to be set aside by Financial Leasing, Factoring and Financing Companies for their Receivables" published in the Official Gazette dated 20 July 2007 and numbered 26588 by BRSA, the Group's specific provision rate allocated for the below finance lease receivables considering their collaterals as at 1 January 2008 are as follows: 20%, at a minimum, for finance lease receivables overdue more than 150 days not exceeding 240 days, 50%, at a minimum, for finance lease receivables overdue more than 240 days not exceeding 360 days; and 100%, at a minimum, for finance lease receivables overdue more than 1 year.

The Group classifies its overdue finance lease receivables not exceeding 360 days as under the "Non-Performing Receivables" and classifies its finance lease receivables overdue more than 1 year under "Non-Performing Receivables".

In accordance with the above-mentioned Communiqué, specific provision rate allocated for the factoring receivables considering their collaterals are as follows: 20%, at a minimum, for factoring receivables overdue more than 90 days not exceeding 180 days; 50%, at a minimum, for factoring receivables overdue more than 180 days not exceeding 360 days; and 100%, at a minimum, for factoring receivables overdue more than 1 year.

While the Group provides 100% provision for doubtful factoring receivables which do not have worthy collaterals without considering the time intervals above, the Group provides provision for its other doubtful receivables having possibility of recovery based on the time intervals mentioned above.

When the Group annuls overdue foreign currency leasing contracts, it converts foreign currency receivables into TL using the exchange rate at the annulment date and does not evaluate such amounts starting from the annulment date. Since invoice issuance for such receivables is ceased, the Group also ceases its income accrual calculation starting from the annulment date.

Other receivables that have fixed or determinable payments that are not quoted in an active market are also classified in this category. These receivables are measured at amortized cost using the effective interest method less any impairment.

g. Financial Instruments (Continued)

Financial assets (Continued)

Impairment of financial assets

Financial assets, other than those at fair value through profit or loss are subject to impairment testing at each reporting date to determine whether there is any indicator of impairment for financial asset or financial asset group. An entity shall assess at each reporting date whether there is any objective evidence that a financial asset or group of financial assets is impaired. A financial asset or group of financial assets is impaired and impairment losses are incurred if there is objective evidence of impairment as a result of one or more events that occurred after the initial recognition of the asset. That loss event or events must also have an impact on the estimated future cash flows of the financial asset or group of financial assets. For the financial assets which are measured at amortized cost, except for finance lease receivables and factoring receivables stated above, the amount of impairment is the difference between the asset's carrying amount and the present value of estimated future cash flows discounted at the original effective interest rate.

The carrying amount of the financial asset is reduced by impairment loss directly for all financial assets with the exception of finance lease receivables and factoring receivables where the carrying amount is reduced through the use of an allowance account. When a receivable is uncollectible, it is written off against the allowance account. Changes in allowance accounts are recognized in profit or loss.

With the exception of available for sale equity instruments, if, in a subsequent period the amount of the impairment loss decreases and the decrease can be objectively related to an event occurring after the impairment was recognized, the previously recognized impairment loss is reversed through profit or loss to the extent the carrying amount of the investment at the date the impairment is reversed does not exceed the amortized cost that would have been impaired.

Increase in fair value of available for sale equity instruments subsequent to impairment is recognized in directly in equity.

Cash and cash equivalents

Cash and cash equivalents comprise cash on hand and demand deposits, and other short-term highly liquid investments with maturities of three months or less than three months from date of acquisition and that are readily convertible to cash and are subject to an insignificant risk of changes in value.

Financial liabilities

Financial liabilities and equity instruments issued by the Group are classified according to the substance of the contractual arrangements entered into and the definitions of a financial liability and an equity instrument. An equity instrument is any contract that evidences a residual interest in the assets of the Group after deducting all of its liabilities. The accounting policies adopted for specific financial liabilities and equity instruments are set out below.

Financial liabilities are classified as either financial liabilities at FVTPL or other financial liabilities.

Financial liabilities at fair value through profit or loss

Financial liabilities are classified as at FVTPL and stated at fair value, with any resulting gain or loss recognized in profit or loss. The net gain or loss recognized in profit or loss includes any interest paid on the financial liability.

g. Financial Instruments (Continued)

Other financial liabilities

Other financial liabilities, including borrowings, are initially measured at fair value, net of transaction costs.

Other financial liabilities are subsequently measured at amortized cost using the effective interest method plus the interest expense recognized on effective interest method.

The effective interest method that calculates the amortized cost of a financial liability and allocates interest expense over the relevant period. The effective interest rate discounts the estimated future cash payments through the expected life of the financial liability, or, where appropriate, a shorter period to net present value of financial liabilities

Derivative financial instruments and hedge accounting

The Group's activities expose it primarily to the financial risks of changes in foreign exchange rates and interest rates. The Group uses derivative financial instruments (primarily foreign currency forward and currency swap contracts) to hedge its risks associated with foreign currency fluctuations relating to certain firm commitments and forecasted transactions. Derivative financial instruments are initially measured at fair value on the contract date, and are remeasured at fair value at subsequent reporting dates. Although some of the derivative transactions provide economic hedging, since all necessary conditions for hedge accounting have not been met, the Group classifies these transactions as held for trading and therefore, changes in the fair value of derivative financial instruments are recognized in profit or loss as they arise.

h. Business Combinations

The acquisitions of subsidiaries are accounted for by using the purchase method. The cost of the acquisition is measured at the aggregate of fair value, at the date of exchange, of the assets given, liabilities incurred or assumed, and equity instruments issued by the Group in exchange for the control of the acquiree. The acquiree's identifiable assets, liabilities and contingent liabilities that meet the conditions for recognition under TFRS 3 "Business Combinations" are recognized at fair value at the acquisition date, except for non-current assets (or disposal groups) that are classified as held for sale in accordance with TFRS 5 "Non-Current Assets Held for Sale and Discontinued Operations", which are recognized and measured at fair value less costs to sell.

Goodwill arising on acquisition is recognized as an asset and initially measured at cost, being the excess of the cost of the business combination over the Group's interest in the net fair value of the identifiable assets, liabilities and contingent liabilities recognized. When the Group's interest in the net fair value of the acquiree's identifiable assets, liabilities and contingent liabilities exceeds the cost of the business combination, excess amount is recognized immediately in profit or loss.

The interest of non-controlling shareholders in the acquiree is initially measured at the non-controlling party's proportion of the net fair value of the identifiable assets, liabilities and contingent liabilities recognized.

i. Effects of Changes in Exchange Rates

The individual financial statements of each group entity are presented in the currency of the primary economic environment in which the entity operates (its functional currency). For the purpose of the consolidated financial statements, the results and financial position of each entity are expressed in TL, which is the functional currency of the Group, and the presentation currency for the consolidated financial statements.

i. Effects of Changes in Exchange Rates (Continued)

The foreign currency exchange rates used by the Group as at 31 December 2015 and 31 December 2014 are as follows:

	<u>31 December 2015</u>	<u>31 December 2014</u>
USD	2,9076	2,3189
EUR	3,1776	2,8207
GBP	4,3007	3,5961
CHF	2,9278	2,3397
100 JPY	2,4078	1,9347

In preparation of the financial statements of the individual entities, transactions in currencies other than TL (foreign currencies) are recorded at the prevailing exchange rates at the transaction date. At each reporting date, monetary items denominated in foreign currencies are retranslated at the rates prevailing at the reporting date. Non-monetary items carried at fair value that are denominated in foreign currencies are retranslated at the rates prevailing at the date when fair value is determined.

Non-monetary items that are measured in terms of historical cost in a foreign currency are not retranslated.

j. Earnings Per Share

Earnings per share presented in the accompanying consolidated income statement is determined by dividing net income by the weighted average number of shares in issue during the year.

In Turkey, companies can increase their share capitals by issue of "Bonus Shares" to their shareholders from their retained earnings. In computing earnings per share, such issues of "Bonus Shares" are treated as issued shares. Accordingly, the retrospective effect for those share issues is taken into consideration in determining the weighted-average number of shares outstanding used in this computation.

k. Subsequent Events

Subsequent events means the events occurred between the reporting date and the authorization date for the announcement of the financial statements. In accordance with TAS 10 "Events After the Balance Sheet Date"; post-balance sheet events that provide additional information about the Group's position at the balance sheet dates (adjusting events) are reflected in the consolidated financial statements. Post- balance sheet events that are not adjusting events are disclosed in the notes when material.

**l. Provisions, Contingent Liabilities and Contingent Assets:**

In accordance with TAS 37 "Provisions, Contingent Liabilities and Contingent Assets", a provision is recognized when the Group has a legal or constructive obligation as a result of a past event and it is probable that an outflow of resources embodying economic benefits will be required to settle the obligation, and a reliable estimate can be made of the amount of the obligation. If the specified criteria are not met, the Group discloses the related issues in the accompanying notes. Provisions are determined by discounting the expected future cash flows at a pre-tax rate that reflects current market assessments of the time value of money and the risks specific to the liability if the time value of the money is significant to the provision.

Contingent assets are disclosed in the notes and not recognized unless they are realized.

**m. Leases**

*- Group as Lessor*

The Group's accounting policies over finance leases are disclosed in note (g).

*- Group as Lessee*

Leases are classified as finance leases whenever the terms of the lease transfer substantially all the risks and rewards of ownership to the lessee. All other leases are classified as operating leases.

Assets held under finance leases are recognized as assets of the Group at their fair value at the inception of the lease or, if lower, at the present value of the minimum lease payments. The corresponding liability to the lessor is included in the statement of financial position as a finance lease obligation. Lease payments are apportioned between finance charges and reduction of the lease obligation so as to achieve a constant rate of interest on the remaining balance of the liability. Finance charges are charged to profit or loss in accordance with the Group's general policy on borrowing costs. Rentals payable under operating leases are charged to profit or loss on a straight-line basis over the term of the relevant lease. Lease incentives received or to be received to enter into an operating lease are also recognized in the profit or loss on a straight-line basis over the lease term.

**n. Segment Reporting**

The Group has two different operating segments, leasing and factoring, that is used by management to make decisions about resources to be allocated to the segments and assess their performance, and for which discrete financial information is available (Note 29).

**3. SIGNIFICANT ACCOUNTING POLICIES (Continued)**

**o. Taxes on Income**

Turkish Tax Legislation does not permit a parent company and its subsidiary to file a consolidated tax return. Therefore, provisions for taxes, as reflected in the accompanying consolidated financial statements, have been calculated on a separate-entity basis.

Income tax expense or credit comprises current and deferred tax. Current tax and deferred tax are recognized in profit or loss except to the extent that it relates to a business combination, or items recognized directly in equity or in other comprehensive income.

Current tax is the expected tax payable or receivable on the taxable income or loss for the year, using tax rates enacted or substantively enacted at the reporting date, and any adjustment to tax payable in respect of previous years.

Deferred tax is recognized in respect of temporary differences between the carrying amounts of assets and liabilities for financial reporting purposes and the amounts used for taxation purposes. Deferred tax is not recognized for the following temporary differences: the initial recognition of assets or liabilities in a transaction that is not a business combination and that affects neither accounting nor taxable profit or loss, and differences relating to investments in subsidiaries and jointly controlled entities to the extent that it is probable that they will not reverse in the foreseeable future. In addition, deferred tax is not recognized for taxable temporary differences arising on the initial recognition of goodwill. Deferred tax is measured at the tax rates that are expected to be applied to temporary differences when they reverse, based on the laws that have been enacted or substantively enacted by the reporting date. Deferred tax assets and liabilities are offset if there is a legally enforceable right to offset current tax liabilities and assets, and they relate to income taxes levied by the same tax authority on the same taxable entity, or on different tax entities, but they intend to settle current tax liabilities and assets on a net basis or their tax assets and liabilities will be realized simultaneously.

A deferred tax asset is recognized for unused tax losses, investment incentives, tax credits and deductible temporary differences, to the extent that it is probable that future taxable profits will be available against which the temporary difference can be utilized. Deferred tax assets are reviewed at each reporting date and are reduced to the extent that it is no longer probable that the related tax benefit will be realized.

Deferred taxes related to fair value measurement of available for sale assets are charged or credited to Other Comprehensive Income and subsequently recognized in profit or loss together with the deferred gains that are realized.

**p. Employee Benefits / Reserve for Employee Termination Benefits**

In accordance with the existing social legislation in Turkey, the Group is required to make certain lump-sum payments to employees whose employment is terminated due to retirement or for reasons other than resignation or misconduct. Such payments are recognized in the accompanying consolidated financial statements as accrued. The computation of the liability is based upon the retirement pay ceiling announced by the government.

In accordance with TAS 19 "Employee Benefits", the Group calculated the employee severance indemnities incurred due to retirement of its employees by discounting the future liabilities to their present values, by using actuarial method and reflected to the consolidated financial statements. The main estimates used are as follows:

r. Statement of Cash Flows

The Group presents statement of cash flows as an integral part of its financial statements to inform the users of financial statements about its ability to manage changes in its net assets, its financial structure and the amount and timing of its cash flows under changing conditions.

In the statement of cash flows, the cash flows for the period are reported with a classification of operating, investment and financing activities. Cash flows related with operating activities compose of the cash flows arising from core operations of the Company. Cash flows related with investment activities compose of cash flows that the Group generates from or uses in investment activities (tangible and financial investments). Cash flows related with financing activities represent resources that the Group uses for financing activities and the reimbursements of such resources.

s. Share Capital and Dividends

Common shares are classified as equity. Dividends on common shares are reclassified as dividend payables by netting off from the retained earnings in the period in which they are approved and disclosed.

t. Related Parties

In accordance with TAS 24 "Related Party Disclosures" shareholders, key management and board members, in each case together with companies controlled by or affiliated with them, and associated companies are considered and referred to as related parties. Related party transactions consist of the transfer of the assets and liabilities between related parties by a price or free of charge.

For the purpose of the accompanying consolidated financial statements, shareholders of the Company, the companies controlled by/associated with them, key management and the Board members of the Company are referred to as related parties (Note 9).

**13. DEFERRED TAX ASSETS AND LIABILITIES (Continued)**

Investment Incentive:

The statement "limited to 2006, 2007 and 2008 only" in the 69th Article of the Income Tax Law No. 193, which was cancelled by the Constitutional Court decision No. 2009/144 and published in the Official Gazette on 8 January 2010, was re-regulated by the Law No. 6009 Article 5, published in the Official Gazette No. 27659, dated 1 August 2010. This new legislation enabled without any year limitation the continued utilization of investment allowances, which are carried forward due to insufficient current year earnings. However, the amount of investment allowance to be utilised may not exceed 25% of earnings for the year. With this change, corporation tax rate adopted for corporations benefiting from investment allowance is determined at the current rate (20 %) instead of the previous rate of 30 %. The clause "The amount which to be deducted as investment incentive to estimate tax base cannot exceed 25 % of related income" which has been added to first clause of the temporary 69th article of Law No:193 with the 5th article of Law No:6009 on Amendments to Income Tax Law and Some Other Laws and Decree Laws has been abrogated with the decision of the Constitutional Court dated 9 February 2012 no. 2012/9. Subsequent to the decision of the Court, necessary amendments has been made by Revenue Administration Department for the tax payers to utilize investment incentives in their 2011 tax declarations without taking 25 % limit into account. The Group may utilise TL 132.895 (31 December 2014: TL 283.354) of its unused investment allowances as offset against its future profits. The Group has TL 266 (31 December 2014: TL 18.735) of deferred tax assets comprising of unused investment allowances, which may be offset against future profits. Partial or whole recoverable amounts of deferred tax asset are estimated based on current conditions. Future profit projections and potential tax planning strategies have been taken into consideration for valuation purposes.

#### Corporate Tax

The Group is subject to the Turkish corporate taxes. Provision is made in the accompanying financial statements for the estimated charge based on the Group's results for the period.

Turkish tax legislation does not permit a parent company and its subsidiary to file a consolidated tax return. Therefore, provisions for taxes, as reflected in the accompanying consolidated financial statements, have been calculated on a separate-entity basis.

Corporate tax is applied on taxable corporate income, which is calculated from the statutory accounting profit by adding non-deductible expenses, and by deducting dividends received from resident companies, other exempt income and investment incentives utilized.

As at 31 December 2015, corporate income tax rate is 20% (31 December 2014: 20%).

In Turkey, advance tax returns are filed on a quarterly basis. The advance corporate income tax rate is 20% (31 December 2014: 20%). Under the Turkish taxation system, tax losses can be carried forward up to five years. Tax losses cannot be carried back to offset profit from previous periods.

In Turkey, there is no procedure for a final and definitive agreement on tax assessments. Companies file their tax returns between 1 April and 25 April of the following year (between 1st and 25th of the following fourth month of the tax year for the tax responsible who have special tax years). Tax authorities may, however, examine such returns and the underlying accounting records and may revise assessments within five years.

**37. TAXATION (Continued)**

Income Withholding Tax

In addition to corporate taxes, companies should also calculate income withholding taxes and funds surcharge on any dividends distributed, except for companies receiving dividends who are resident companies in Turkey and Turkish branches of foreign companies. The rate of income withholding tax is 10 % period between 24 April 2003 and 22 July 2006. This rate was changed to 15% with the cabinet decision numbered 2006/10731 commencing from 22 June 2006. Undistributed dividends incorporated in share capital are not subject to income withholding taxes.

Withholding tax at the rate of 19,8 % is still applied to investment allowances relating to investment incentive certificates obtained prior to 24 April 2003. After this date, companies can deduct 40 % of the investments within the scope of the investment incentive certificate and that are directly related to production facilities of the companies. There is no withholding tax on the investments incentives utilized without investment incentive certificates.

Investment Incentives

Temporary Article 69 added to the Income Tax Law numbered 193 with Law no 5479, which became effective starting from 1 January 2006, upon being promulgated in Official Gazette no 26133 dated 8 April 2006, stating that taxpayers can deduct the investment allowance exemption amounts which were present according to legislative provisions effective on 31 December 2005 (and by taking into account the corporate tax legislation in that date) only from the corporate profits of 2006, 2007 and 2008. Accordingly, the investment incentive allowance practice was ended as of 1 January 2006.

At this perspective, an investment allowance which cannot be deducted partially or totally in three years was not allowed to be transferred to following years and became unavailable as of 31 December 2008. On the other side, Article 19 of the Income Tax Law was annulled and the investment allowance practice was ended as of 1 January 2006 with effectiveness of Article 2 and Article 15 of the Law no 5479 and the right of investment allowance became unavailable during the period of 1 January 2006 and 8 April 2006.

However, on 15 October 2009, Turkish Constitutional Court decided to cancel the clause numbered (2) of the Article 15 of the Law 5479 and expressions of "2006, 2007, 2008" in the Temporary Article 69 related to investment allowance mentioned above that enables effectiveness of the Law as at 1 January 2006 rather than 8 April 2006, since it is against the Constitution. Accordingly, time limitations for carried forward investment allowance gained in the previous period of mentioned date and limitations related to investments commenced between the dates of the Law promulgated and 1 January 2006 were eliminated. According to the decision of Turkish Constitutional Court, cancellation of investment allowance become effective with promulgation of decision on the official gazette and the decision of Turkish Constitutional Court was promulgated in Official Gazette no 27456 dated 8 January 2010.

(Amounts are expressed in thousands of Turkish Lira ("TL") unless otherwise stated.)

**37. TAXATION (Continued)**

According to the decision mentioned above, investment allowances transferred to 2006 due to lack of profit and investment allowances gained by the investments that are commenced before 1 January 2006 and continued after that date constituting economic and technical integrity will not be only used in 2006, 2007 and 2008, but also in the following years. However, the amount of investment allowance to be utilised may not exceed 25% of earnings for the year according to amendments to the Income Tax Law promulgated in Official Gazette no 27659 dated 1 August 2010. With this amendment, corporation tax rate adopted for corporations benefiting from investment allowance is determined at the current rate (20%) instead of the previous rate of 30 %.

The statement "the amount of investment allowance to be utilized may not exceed 25 % of earnings for the year" was cancelled by the Constitutional Court decision No.2012/9 dated 9 February 2012. Subsequent to the decision of the Court, necessary amendments has been made by Revenue Administration Department for the tax payers to utilize investment incentives in their 2011 tax declarations without taking 25 % limit into account.

Transfer Pricing

In Turkey, the transfer pricing provisions have been stated under the Article 13 of Corporate Tax Law with the heading of "disguised profit distribution via transfer pricing". The General Communiqué on disguised profit distribution via Transfer Pricing sets details about implementation.

If a taxpayer enters into transactions regarding sale or purchase of goods and services with related parties, where the prices are not set in accordance with arm's length principle, then related profits are considered to be distributed in a disguised manner through transfer pricing. Such disguised profit distributions through transfer pricing are not accepted as tax deductible for corporate income tax purposes.

**38. EARNINGS PER SHARE**

Earnings per share are calculated by dividing profit or loss by the weighted average number of ordinary shares outstanding during the period. In Turkey, companies can raise their share capital by distributing "bonus shares" to shareholders from retained earnings. In computing earnings per share, such "bonus share" distributions are assessed as issued shares. Accordingly, the retrospective effect for those share distributions is taken into consideration in determining the weighted-average number of shares outstanding used in this computation.

The weighted average number of shares of the Group and earnings per share for the year ended 31 December 2015 and 31 December 2014 are as follows:

	<b>1 January- 31 December 2015</b>	<b>1 January- 31 December 2014</b>

(d) Financial risk management objectives

The Group's corporate treasury function provides services to the business, coordinates access to domestic and international markets, monitors and manages the financial risks relating to the operations of the Group through internal risk reports which analyses exposures by degree and magnitude of risk. Such risks include market risk (including currency risk, interest rate risk and price risk), liquidity risk and credit risk.

The Group uses derivative instruments to minimize the effects of such risks and it also uses such instruments for hedging. The Group does not enter into or trade any financial instruments (including derivative financial instruments) for speculative purposes.

In order to minimize potential risks, the Group reports monthly to the risk management committee which is in charge of monitoring risks and the policies applied.

**40. ADDITIONAL INFORMATION ON FINANCIAL INSTRUMENTS (Continued)**

(e) Market risk

Market risk is the risk that changes in market prices, such as foreign exchange rates (refer to section f), interest rates (refer to section g) and equity prices will affect the Group's income or the value of its holdings of financial instruments. To manage risks relating to exchange rates and interest rates, the Group uses various derivative financial instruments including the following:

- "Forward foreign exchange contracts" to hedge the exchange rate risk arising from operations.
- "Currency swaps" to control the exchange rate risk of foreign currency denominated liabilities.

At the Group level, market risk exposures are measured by sensitivity analysis.

There has been no change in the Group's exposure to market risks or the method it uses to manage and measure such risks.

(f) Currency risk management

Currency risk is the risk that the value of financial instruments will fluctuate due to changes in foreign exchange rates. The Group has exposure to the effects of fluctuations in the prevailing foreign currency exchange rates on its consolidated financial position and cash flows. The Group manages this currency risk by using the foreign exchange derivative contracts.

Foreign currency sensitivity

The Group is mainly exposed to USD and EUR exchange rate risks.

The table below indicates the sensitivity of the Group to USD and Euro when there is a 15 % of change in such exchange rates. The Group uses 15 % of rate change when it reports its foreign currency risk to the top management and this rate represents the top management's expectation on the exchange rate fluctuations. Sensitivity analysis made in relation to the Group's exposure to foreign currency at the reporting period is determined based on the fluctuations at the beginning of the fiscal year and the analysis are fixed during the reporting period. Positive amount refers to an increase in the net profit.

Forward foreign exchange contracts and currency swaps

The Group uses forward foreign exchange contracts and currency swaps to cover the risks of receipts and payments, expected sales and purchases in a certain foreign currency.

(g) Interest rate risk management

The Group is exposed to interest rate risk as the Group borrows funds at both fixed and variable rates. Such risk is managed by making a proper classification between fixed and variable rate liabilities.

Interest rate sensitivity

The interest rate sensitivity analysis below is based on the Group's exposure to interest rate risk at the reporting date and estimated interest rate fluctuations at the beginning of the fiscal year, and is fixed during the reporting period. The Group management makes its sensitivity analysis based on a 100 base point interest rate fluctuation scenario. This rate is also used in reporting to the top management.

As at 31 December 2015 and 31 December 2014, the interest rate profile of the Group's interest-bearing financial instruments is as follows:

	<u>31 December 2015</u>	<u>31 December 2014</u>
<b><u>Fixed rate instruments</u></b>		
Financial assets:		
Banks	209.536	173.493

(g) Interest rate risk management (Continued)

Interest rate sensitivity (Continued)

If interest rates were 100 base points higher at the reporting date and all other variables were fixed:

- Interest income from finance leases with variable interest rates would be higher at an amount of TL 1.836 (31 December 2014: TL 1.943)
- Interest income from factoring transactions with variable interest rates would be higher at an amount of TL 3.671 (31 December 2014: TL 2.074)
- Interest expense on funds borrowed with variable interest rates would be higher at an amount of TL 12.868 (31 December 2014: TL 8.053)

(h) Other price risks

The Group is exposed to equity securities price risks because of equity investments. Equity securities are held especially for strategic purposes rather than trading purposes. These investments are not traded by the Group.

Equity price sensitivity

Sensitivity analysis below is determined based on the equity share price risks exposed as at the reporting date.

Equity price risk is the risk that the fair values of equities decrease as a result of the changes in the levels of equity indices and the value of individual stocks.

If data used in the valuation method were 15 % higher / lower and all other variables were fixed:

The effect on equity (without tax effects) as a result of change in the fair value of equity instruments quoted to Borsa İstanbul (Istanbul Stock Exchange) held as financial assets available for sale in the accompanying consolidated financial statements, due to a reasonably possible change in equity indices, with all other variables held constant, would be TL 896 (31 December 2014: TL 598).

(i) Credit risk management

Credit risk refers to the risk that a counterparty will default on its contractual obligations resulting in financial loss to the Group. The Group has adopted a policy of only dealing with creditworthy counterparties and obtaining sufficient collateral where appropriate, as a means of mitigating the risk of financial loss from defaults. The Group's exposure to credit risks and credit ratings of its counterparties are monitored periodically. Credit exposure is controlled by counterparty limits that are reviewed and approved by the risk management committee.

Finance lease receivables consist of a large number of customers, spread across diverse industries and geographical areas. Ongoing credit evaluation is performed on the financial condition of accounts receivable.

(j) Liquidity risk management

Liquidity risk management responsibility mainly belongs to the board of directors. The board of directors has built an appropriate liquidity risk management framework for the management of the Group's short, medium and long term funding and liquidity management requirements. The Group manages its liquidity risk by maintaining adequate reserves, banking facilities and reserve borrowing facilities by constantly monitoring forecasts and actual cash flows and matching the maturity profile of financial assets and liabilities.

Liquidity risk table

The following table details the maturities of non-derivative financial assets and liabilities. The tables below have been drawn up based on the undiscounted contractual amounts of the financial assets and liabilities based on their maturities. Interest amounts to be collected and to be disbursed regarding the Group's assets and liabilities have also been included in the table below.

(k) Fair value of financial instruments

Except for the items below, the Group management estimates that the carrying amount of the financial assets and liabilities approximate to their fair value.

Fair value of the financial instruments is determined based on the reliable data provided from financial markets in Turkey. Fair value of other financial assets is determined by the benchmarking market value of a similar financial asset or by assumption methods which includes discounting future cash flows with current interest rates.

The table below refers to the comparison of carrying amounts and fair values of financial instruments which are carried at other than their fair value in the financial statements.

(i) Fair value hierarchy

The table below analyses financial instruments carried at fair value, by valuation method. The different levels have been defined as follows:

Level 1: quoted prices (unadjusted) in active markets for identical assets or liabilities

Level 2: inputs other than quoted prices included within Level 1 that are observable for the asset or liability, either directly (i.e., as prices) or indirectly (i.e., derived from prices)

Level 3: inputs for the asset or liability that are not based on observable market data (unobservable inputs).
